

## Additional Information and Resources in Hayward

The City website [www.hayward-ca.gov](http://www.hayward-ca.gov) has information on recycling services- from the home page, select “City Services” in the menu at the left of the page.

Free curbside collection of used oil is available to residential customers (Note that the service is generally not available to residents of multifamily housing that have dumpster service.) The oil must be in the containers provided by Curbcycle, and set next to (not in) the recycling cart on the regular recycling service day. Call (510) 537-9963 for containers.

Residents who do not have curbside service may take used oil to any of Hayward’s collection centers (listed on the last page of the student lesson book.)

The Alameda County website [www.stopwaste.org](http://www.stopwaste.org) has a wealth of additional information about waste reduction and recycling. From the home page, you can use drop-down menus to access information about recycling a wide variety of materials. More general information can be found by clicking on the yellow box for “Residents.” The blue box for “Schools” describes free recycling resources and assistance available to schools.

A direct link to the site’s section on household hazardous waste is at [www.household-hazwaste.org](http://www.household-hazwaste.org). There are three drop-off locations for toxic materials such as household cleaners, pesticides, fluorescent tubes, paint, and batteries. The locations are in Hayward, Livermore and Oakland, and are open on a limited schedule. The schedule and maps to the locations are on the website. These drop-off locations should be used to dispose of motor oil that has been contaminated with other materials such as gasoline, antifreeze or solvents, and absorbents such as rags or cat litter that have been used to clean up oil spills.

The site also has a section on alternatives to hazardous household products that you and your students may find interesting.

For broader local environmental information, check out the National Resources Defense Council’s site called “Green Gate” [www.nrdc.org/greengate/](http://www.nrdc.org/greengate/), an “Environmental Guide to the San Francisco Bay Area.” It is very easy to navigate, has a wide range of information, and has links to other organizations in the “Green Guides and Resources” section.
