

TPR

How to recycle the oil and the oil filter.

1. Put the oil drain pan underneath the car engine.
2. Remove the engine oil plug and drain the oil into the drain pan.
3. Find a screw-top plastic container and a funnel.
4. Pour the dirty oil into the container.
5. Screw on the top tightly.
6. Remove the dirty oil filter.
7. Put the dirty oil filter into a plastic bag.
8. Add new motor oil to your car.
9. Take the dirty oil and the oil filter to the local oil recycle center.
