

FILTER FACTS

-  Used oil filters are a hazardous waste if not recycled
-  It is illegal to throw them away (drained or undrained), homeowners are not exempt
-  On average, an oil filter weighs 1 pound
-  An average oil filter has a pound of steel
-  An undrained used oil filter can contain up to a quart of oil
-  Recycling one ton of filters yields 1,700 pounds of steel, 30 gallons of used oil (3-4 gallons/55 gallon drum) and saves 10 cubic yards of landfill space
